# Surveillance Cameras

## Surveillance Cameras

-Network IP Camera
-AHD/TVI/CVI Camera
-Analog CCD/CMOS Camera

## 1 WDR - Wide Dynamic Range

It produces clear picture quality even under back light condition when there are both very bright and dark area simultaneously.

Conventional

Wide Dynamic Range (WDR)

## 2 Smart IR

Longse Smart IR technology automatically adjusts IR lighting intensity and ensures that the camera captures usable video in dark conditions, even when the object of interest is located close to the IR LEDs.

Normal IR Camera

IR Low Illumination

## 3 HLC (High Light Compesation)

It will mask the source of the bright light with a dark shape, thus allowing the area to the side of the light source to be viewed and recorded. HLM or HLC is the same features.

HLC Off

HLC On

## 4 Defog / Demist

The defog/demist function uses an advanced algorithm to enhance the images captured in hazy ambient conditions such as fog, mist, harsh, backlighting, or low ambient lighting. This function gives a sharp, clear picture, even in less that ideal conditions.

Demist Off

Demist On

## 5 Smart NR (3D Noise Reduction)

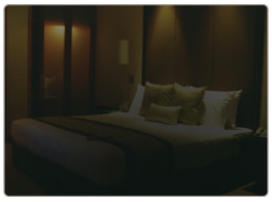
3DNR Technology (3D Noise Reduction) is a method of suppressing noise in an image, appearing in low light.

3DNR: Off

3NDR: On

## 6 Sense-Up (Slow Shutter)

See in color-in the dark! By automatically slowing the shutter speed, the camera is able to pick up the slightest traces of light to display a bright image.



Sense Up: Off

Sense Up: On

## 7 True Day/Night (IR Cut Filter)

For more accurate, vivid color reproduction during daytime use, an IR Cut filter is automatically moved over the lens to block unwanted IR. At night, the filter is removed to deliver maximum visibility and clear IR illumination.

Day

## 8 Motion Detection

By defining areas of interest – like a door, driveway or window – you can define when the NVR should start recording video. You can schedule recordings, or the NVR can record when there is motion.
This not only conserves hard drive space, but also means you can record for more days before older recordings are overwritten.

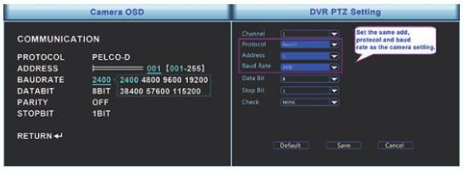
# Manual Zoom

## Manual Varifocal Lens:

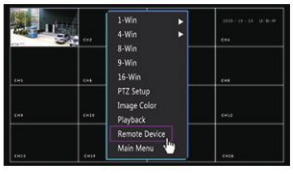
4-9mm, 2.8-12mm, 6-22mm

# Auto Zoom (PTZ Camera)

### Zoom Lens By DVR



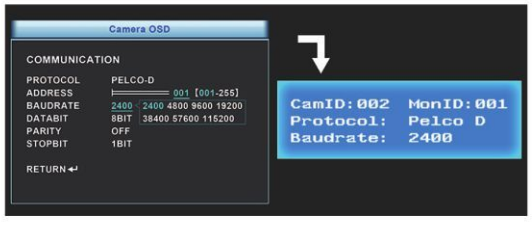
1. Set DVR protocol, baud rate, and ID the same as camera's.



2. Choose channel connected with auto zoom camera. Right click the main screen for quick menu, select "PTZ control".

3. On DVR PTZ interface, click Zoom + and Zoom - for Zoom in and out, and camera has auto focus.

### Zoom Lens By Joystick Controller



1. Set protocol, baud rate, and ID of keyboard controller the same as camera's.

2. Left or right swing the joystick for zoom in and out, cameras auto focus.
